

26G MENTOR-MENTEE TRAINING

FINAL PRESENTATION

NOV 2017 – NOV 2019

MENTOR: VINH LUONG (055)
MENTEE: HIEU TRAN (2040)
TEAM: TOOL DEVELOPMENT
GROUP: BROAD BASE TOOLS 3
RENESAS DESIGN VIETNAM CO., LTD.
RENESAS ELECTRONICS CORPORATION

AGENDA

- Training target & Result Page 03
- Activities & Achievements Page 06
- Difficulty & Solution Page 12

- Plan

TRAINING TARGET & RESULT

Achieve “**Software Design Engineer**” with role **Level 2** by November, 2019
 => Do IDE Design Task without support, if it is within certain degree of difficult.

Role	Skill	Description	Target Level	Current level
Engineer for software design	Software Functional Design	<ul style="list-style-type: none"> Decide the structure of software according to given software requirement definitions. 	2	2
	Software Detailed Design	<ul style="list-style-type: none"> Conduct a detailed software design according to given software structure definitions. 	2	2
Coding engineer	Software Coding	<ul style="list-style-type: none"> Have sufficient knowledge of programming language and create a program based on the detail design document Conduct a code review of created code. 	2	2
	Readability	<ul style="list-style-type: none"> Have knowledge of techniques for improving the source code readability and perform coding accordingly. 	2	2

- Training target & Result (2/3)
- Activities & Achievements
- Difficulty & Solutions
- Plan

TRAINING TARGET & RESULT

Achieve “**Software Design Engineer**” with role **Level 2** by November, 2019
 => Do IDE Design Task without support, if it is within certain degree of difficult.

Role	Skill	Description	Target Level	Current level
Engineer for testing	Test environment setup	<ul style="list-style-type: none"> Have knowledge to set up test environment (set up environment, configure boards/devices, ...). 	2	2
	Testing	<ul style="list-style-type: none"> Conduct tests according to the test specifications 	2	2
	Failure analysis	<ul style="list-style-type: none"> Locate the cause of any trouble and make analysis to find and fix similar bug 	2	2

- Training target & Result (3/3)
- Activities & Achievements
- Difficulty & Solutions
- Plan

TRAINING TARGET & RESULT

Achieve “**Software Design Engineer**” with role **Level 2** by November, 2019
 => Do IDE Design Task without support, if it is within certain degree of difficult.

Skill	Description	Current level
Development Process	<ul style="list-style-type: none"> • Know/Understand and can follow Development process • Can evaluate the results to find and improve weak phase of the process. 	Achieved
Communication skill	<ul style="list-style-type: none"> • Can express idea to others. • Can report status/issues/solutions to teammates. 	Achieved
Management Ability	<ul style="list-style-type: none"> • Can schedule works and follow the schedule • Can manage common risk for assigned tasks: private issues (health,...), technical issues (lack of experience in assigned fields),... 	Achieved

ACTIVITIES & ACHIEVEMENTS

Development environment

Activities

- Read and follow guideline documents
- Confirm and get support from experience engineers

Achievements

- Can setup development environment (target platform, baseline, Git...).
- Can use and configures most boards/devices/emulator in development.
- Can use system tools to support tasks smoothly (JIRA, Confluence, Gerrit, Jenkins, ...)
- Can support new member to setup environment.

- Training target & Result
- [Activities & Achievements \(1/6\)](#)
- Difficulty & Solutions
- Plan

ACTIVITIES & ACHIEVEMENTS

E2studio debugger

Activities

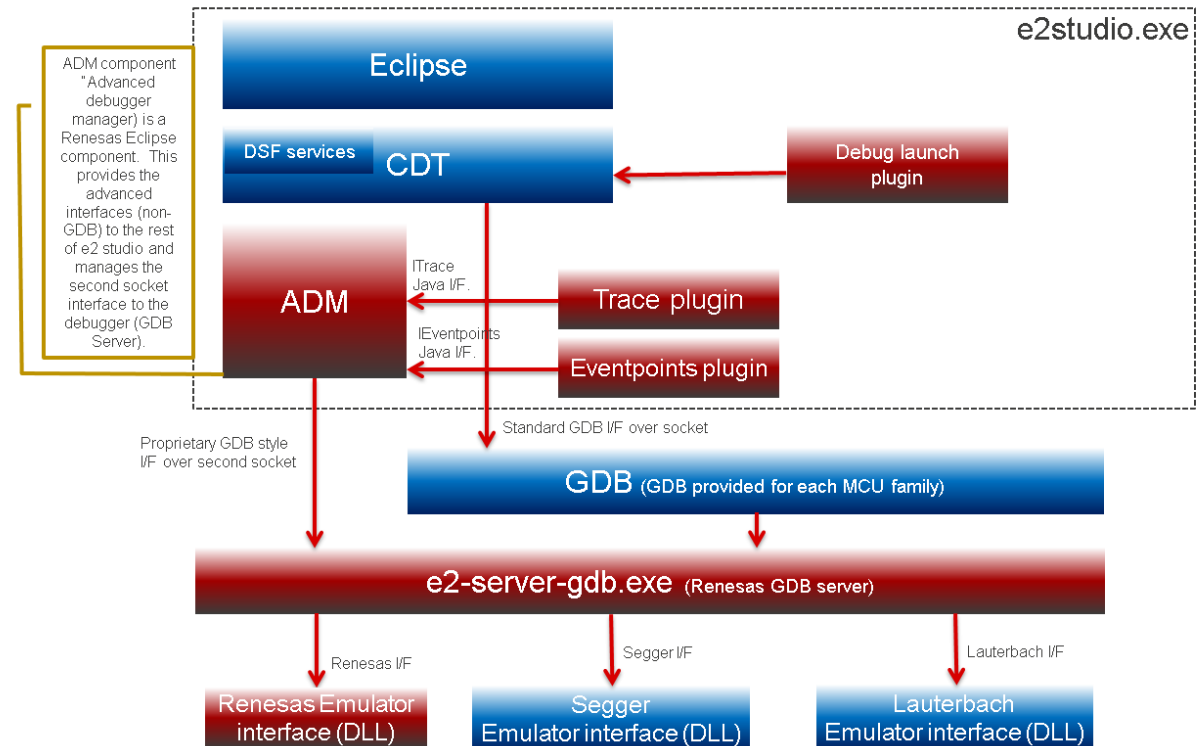

- Train through daily tasks in team (from GUI tasks to GDB server tasks and combination tasks).

Achievements

- Know basic layers and flow of e2studio
- Understand flow and how to communicate between layers
- Can debug flow from GUI to GDB Server through ADM
- Can in charge tasks in GUI, ADM also basic tasks in GDB Server.

- Training target & Result
- [Activities & Achievements \(2/6\)](#)
- Difficulty & Solutions
- Plan

e2 studio Architecture : core component

- Training target & Result
- [Activities & Achievements \(3/6\)](#)
- Difficulty & Solutions
- Plan

ACTIVITIES & ACHIEVEMENTS

Functional Design & Detailed Design

Activities

- Train through daily tasks in team with feature tasks
- Investigate requirement, existing design, propose idea(s), create F.S to confirm via review
- Join tasks for improvement, feature (restructure Coverage plugin, new feature for Memory Usage)
- Propose structure and internal processing flow
- Create D.S and confirm via review.

Achievements

- Can create F.S, D.S, implementation note without support
- Can support to review basic F.S, D.S, implementation note
- Understand deeply structure and processing flow of plugins

- Training target & Result
- [Activities & Achievements \(4/6\)](#)
- Difficulty & Solutions
- Plan

ACTIVITIES & ACHIEVEMENTS

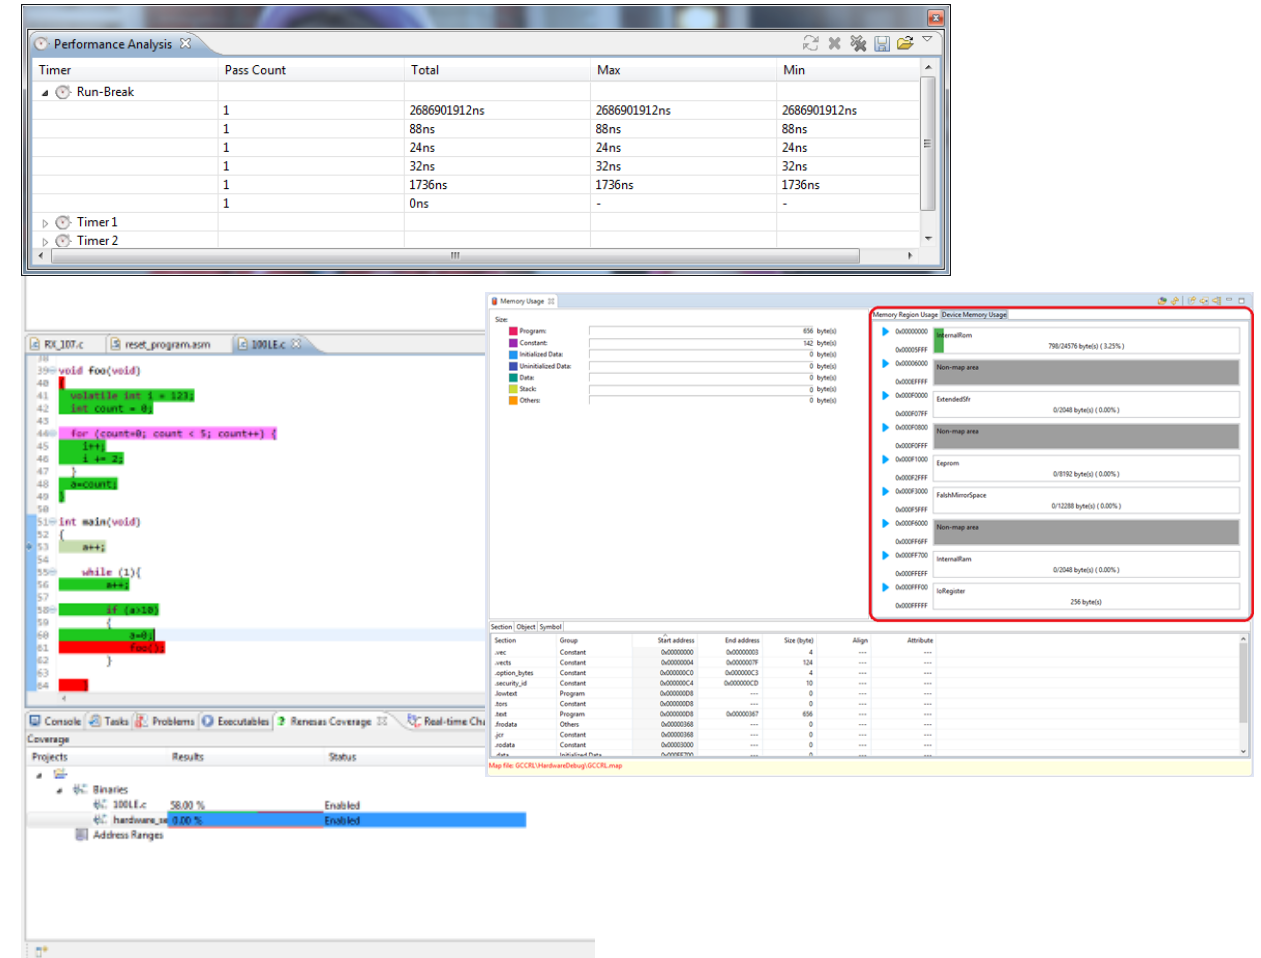

Coding & Development knowledge

Activities

- Train through daily tasks in team with feature tasks
- Challenge to tasks using new technology

Achievements

- Have knowledge about GUI library (SWT, JavaFx)
- Have knowledge about thread, job
- Have knowledge about Collection (List, Set, Map, ...)
- Can create plugin/RCP application.
- Know how to use debugging from Eclipse (Java side) to Visual studio (GDB Server side).
- Have basic knowledge about DSF service.
- Can support to review source code.

ACTIVITIES & ACHIEVEMENTS

Testing

Activities

- Create test cases (UT, IT) for daily tasks.
- Create automation test (JUnit, RCPTT)

Achievements

- Can create test cases to cover source code, also use case
- Can create and review test scripts from existing test cases
- Can analyze fail cases to determine root cause.
- Can review test cases, also test scripts

- Training target & Result
- [Activities & Achievements \(5/6\)](#)
- Difficulty & Solutions
- Plan

The screenshot shows an IDE with the following components:

- Source Editor:** Displays the `BasicBirthdayService` class implementing `IBirthdayService`. It includes methods for `checkBirthdayIsValid`, `getBirthDay`, `getChineseZodiac`, and `getBirthDayOfWeek`.
- Test Editor:** Shows `ITestBirthdayService` with a `testCheckBirthdayIsValid` method using `JUnit5` annotations like `@Test`, `@BeforeEach`, and `assertEquals`.
- Console:** Displays the output of the test run, showing that the test passed.
- Coverage:** A table showing the coverage of the code. The table has columns for Element, Coverage, Covered Instructions, Missed Instructions, and Total Instructions.

Element	Coverage	Covered Instructions	Missed Instructions	Total Instructions
com.example.joy.myFirstSpringBoot	73.2 %	383	140	523
com.example.joy.myFirstSpringBoot.services	73.2 %	383	140	523
com.example.joy.myFirstSpringBoot.services.IBirthdayService	59.0 %	181	126	307
com.example.joy.myFirstSpringBoot.services.BasicBirthdayService	59.0 %	181	126	307
com.example.joy.myFirstSpringBoot.contr	92.0 %	69	6	75
com.example.joy.myFirstSpringBoot	37.5 %	3	5	8
com.example.joy.myFirstSpringBoot.okta	0.0 %	0	3	3
com.example.joy.myFirstSpringBoot.bears	100.0 %	130	0	130

ACTIVITIES & ACHIEVEMENTS

Development process

Activities

- Read and following project plan to apply daily tasks.

Achievements

- Understand and apply Agile to daily tasks.

Communication skill

Activities

- Think in reader's view point.
- Share knowledge and training new members

Achievements

- Can discuss and confirm with customer/other members about requirement/tasks.
- Can support to train new members

- Training target & Result
- [Activities & Achievements \(6/6\)](#)
- Difficulty & Solutions
- Plan

- Training target & Result
- Activities & Achievements
- [Difficulty & Solutions \(1/1\)](#)
- Plan

DIFFICULTY & SOLUTIONS

Difficulty	Solutions
Lack of user view point	<ul style="list-style-type: none"> • Create documents to confirm to other members/ customers before implementation
Lack of general view point to make design for plugin. This makes restructure plugin tasks conflict together.	<ul style="list-style-type: none"> • Confirm to experience engineer to get idea(s), solutions • Refer other design and investigate to understand processing flow/spec deeply

PLAN

- Study about ARM architecture for future tasks
- Improve development skills, also design skills
- Improve management skills

- Training target & Result
- Activities & Achievements
- Difficulty & Solutions
- [Plan \(1/1\)](#)

Thank you for listening
